Any business with employees should have a payroll process established; payroll is often the largest expense for a business. An effective and efficient payroll process will ensure that employees are paid accurately and consistently

## Project Consultancy

Planning a project can be difficult, even for experienced teams. This project stage is critical to project success and requires careful input to the Work Breakdown Structure, Schedule and Cost baselines and Project Management Plan. We provide Project and Programme Management services nationally and internationally.

Our technical expertise and outstanding project execution enable us to assist local and multinational client to significantly improve operation capabilities, throughout and process control, optimize cost and minimize risk. We specialize in complying with FDA and EU current good manufacturing practices(CGMP) and international guidelines to help launch new product in the market.

## Turnkey Project

Turn-key projects in practice: In a turn-key project, the supplier takes on complete responsibility for the adherence to delivery dates, the scope and the cost of the entire subject of delivery to the customer. The customer thus is not affected by any risks inside the project and the result of the project is covered by one agreement.

## Warehouse Management

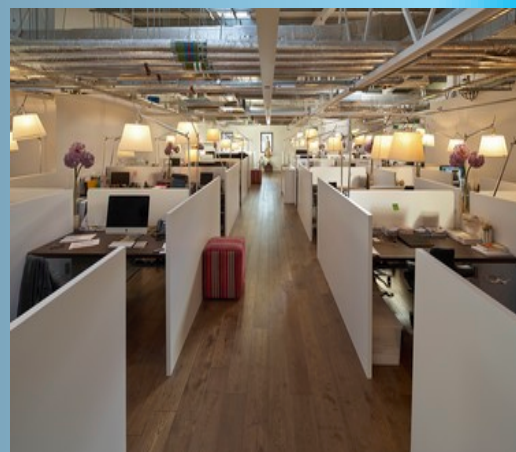

Warehouse management refers to the various processes related to maintaining and controlling a business' warehouse. It goes through every step of the process, from beginning to end, and is usually overseen by warehouse managers. Starting from incoming freight and moving on to asset tracking and logistics
